

ABOUT ME

Self-reliant, creative and disciplined, open to change and with a strong sense of responsibility, both professional and personal. I adapt quickly and work well in a team under pressure. I always act according to my principles and respect the rules and laws of any place where I work. I am effective and efficient, with strong values and a high capacity to perform.

ALEJANDRO STIVEN RESTREPO NARANJO

SOFTWARE DEVELOPER

EDUCATION

SERVICIO NACIONAL DE APRENDIZAJE (SENA) - Technologist in Information Systems Analysis and Development

COURSES

SERVICIO NACIONAL DE APRENDIZAJE
[2019] - [2022]
Freelancing for international clients and emerging languages; software testing.
Skills for implementing software development solutions in line with the design and development methodology.

PLATZI
[2019] - [2022]
Courses in web, mobile and backend development, Git and GitHub, command line, Scrum Foundation Professional Certificate (SFPC), basic and intermediate Python, professional WordPress.

WORK EXPERIENCE

Homepower colombia s.a.s - Semi Senior Backend Developer
[2025]-PRESENT
Design and implementation of REST and GraphQL APIs with NestJS, applying Hexagonal Architecture, DDD and CQRS.
Development of microservices and serverless solutions with AWS Lambda; optimization of PostgreSQL/MySQL/MongoDB.
Implementation of security (JWT, OAuth2, RBAC), testing with Jest and deployments on AWS and Docker in collaboration with Frontend and DevOps.

HOBBIES

Trekking - Mountain biking
Video games - Solving puzzles
Reading - Camping - Rubik cubes

LANGUAGES

SPANISH NATIVE

ENGLISH A2

INCUBANT - Full Stack Developer
[2025]-[2025]
I develop and maintain REST APIs with Node.js and Express, ensuring high performance and security. On the backend I use MySQL (modeling, migrations and query optimization) for reliable data handling. On the frontend I use Angular 19+ to build dynamic interfaces and forms with advanced validation.

APIs and Databases: Design of endpoints documented with Swagger; MySQL query optimization that reduced response times by 30%.

Frontend: Built with Angular using reusable components and state management with RxJS, improving UI reactivity, styled with Tailwind CSS.

Quality and deployment: Automated testing with Jest and CI/CD pipelines (GitHub Actions) for fast and reliable deployments.

TECHBOSS - Full Stack Developer
[2023]-[2024]
Web software developer with broad experience building efficient and scalable applications, working with PHP and Node.js to develop REST APIs and robust backends. My work included integrating databases such as MySQL and MongoDB, ensuring effective and secure data management.
On the frontend, I used Vue.js and React.js to build dynamic and responsive user interfaces. My experience covers performance optimization, application security and the implementation of scalable architectures.

My role included maintaining and developing new features for enterprise projects, always focused on continuous improvement and best development practices.

EBFACTORY - Software Developer
[2021]-[2022]
Responsible for maintaining and developing new features for Inter-American Development Bank projects, including the integration and consumption of REST APIs to extend application functionality. Working with PHP, Drupal, MySQL and Git, and applying agile methodologies such as Scrum to improve development efficiency.

SKILLS
GIT, PHP, PYTHON, NODE.JS, NEST.JS, EXPRESS, DJANGO, GRAPHQL, VUE.JS, REACT.JS, ANGULAR, CSS, TAILWIND CSS, POSTGRESQL, MYSQL, MONGODB, DOCKER, AWS (LAMBDA, S3, EC2), SWAGGER, JEST.JS, LINUX, MACOS
